

BUSINESS INSIGHT REPORT

WINGS Group Trade Marketing Performance Analysis

1. Project Overview

The **WINGS Group Trade Marketing Executive Performance Analysis** project is a business analytics initiative designed to evaluate and improve trade marketing performance through data-driven insights.

By leveraging over 500,000 sales transactions along with product, outlet, channel, and promotional activity data, this project analyzes key business metrics to understand revenue performance, identify major sales contributors, and evaluate factors influencing business growth.

The analysis provides a comprehensive performance overview for the Trade Marketing division, enabling stakeholders to monitor business trends, understand channel and product contribution, and identify strategic opportunities for improving sales effectiveness and operational decision-making.

2. Business Objective

The primary objective of this project is to transform sales and trade marketing data into actionable business insights that support performance monitoring and strategic decision-making within the Trade Marketing division.

This analysis aims to:

- Evaluate overall sales performance and identify key revenue growth trends across different periods.
- Identify the main revenue drivers by analyzing product, SKU, and category contribution.
- Assess sales channel and outlet performance to understand distribution effectiveness and business contribution.
- Provide data-driven insights and recommendations to support trade marketing strategies, improve resource allocation, and enhance business performance.

3. Executive Summary

The Trade Marketing Performance Analysis provides an overview of WINGS Group's business performance by evaluating revenue contribution, product performance, outlet distribution, and regional sales performance.

Based on the analysis, In 2026 WINGS Group generated total revenue of **Rp614.47 million** with **84.03 million units sold**, supported by **358.1 thousand transactions** across **1.2 thousand active outlets**. These indicators demonstrate strong sales activity and broad distribution coverage across multiple sales channels. The analysis identifies that business performance is mainly driven by several key areas:

- **Channel Performance**

Revenue contribution is dominated by **Grosir (35.20%)**, followed by **Minimarket (22.92%)** and **Distributor (21.82%)**. These three outlet types contribute approximately **79.94% of total revenue**, indicating that wholesale and retail distribution channels play a critical role in driving business performance.

- **Product Performance**

From category perspective, **Fabric Care contributes the highest revenue share (24.28%)**, followed by **Personal Care (22.95%)** and **Home Care (16.84%)**. These categories represent the primary product segments supporting revenue generation.

At SKU level, the highest revenue contributors are:

1. Kecap Sedaap: Rp26.4 M
2. SoKlin Liquid Detergent: Rp25.3 M
3. Baby Happy Diaper: Rp23.3 M
4. Serasoft Shampoo: Rp22.2 M
5. SoKlin Softener: Rp21.6 M

- **Regional Performance**

Revenue contribution is concentrated in several provinces, with:

1. Jawa Barat: Rp80.8 M
2. Jawa Timur: Rp65.7 M
3. Sulawesi Selatan: Rp36.5 M
4. Sumatera Selatan: Rp34.9 M
5. Kalimantan Selatan: Rp34.7 M

Overall, the analysis indicates that maintaining strong performance in key channels, products, and regions while identifying expansion opportunities will be essential for improving future trade marketing effectiveness.

4. Detailed Business Insights

4.1 Revenue Performance Insight

Monthly revenue analysis shows fluctuations throughout 2026. Revenue increased significantly from February to March, reaching the highest performance point at approximately Rp65 M, before gradually declining and stabilizing between Rp45 M to Rp50 M in subsequent months. Business Insight:

Business Insight

The revenue pattern indicates that sales performance experiences periodic changes, which may be influenced by demand cycles, promotional activities, product availability, or market conditions.

The significant increase during peak months indicates potential opportunities to identify the factors contributing to higher sales performance and replicate successful strategies.

Recommendation

Trade Marketing team should evaluate the activities implemented during high-performing periods and align promotional planning, inventory availability, and channel execution to maximize future sales opportunities.

4.2 Sales Trend Insight

Revenue contribution varies significantly across outlet types. Grosir represents the largest contribution with **35.20%**, followed by Minimarket (**22.92%**) and Distributor (**21.82%**). Together, these channels contribute nearly 80% of total revenue.

Business Insight

The result indicates that wholesale and retail distribution channels are the main drivers of business revenue. Strong performance in these channels demonstrates the importance of maintaining distribution effectiveness and outlet relationships.

However, dependency on major channels also highlights the opportunity to optimize smaller channels with growth potential.

Recommendation

The Trade Marketing team should maintain strong execution in high-performing channels while developing strategies to improve contribution from underperforming channels such as Marketplace and Supermarket.

4.3 Product Performance Insight

Revenue contribution is concentrated among several product categories. Fabric Care contributes the highest share at **24.28%**, followed by Personal Care (**22.95%**) and Home Care (**16.84%**).

At product level, Kecap Sedaap becomes the highest revenue contributor with Rp26.4 M.

Business Insight

The performance indicates that household and personal care products are important revenue drivers for WINGS Group. Maintaining availability and visibility of these products is important to sustain business performance.

Recommendation

Trade Marketing should prioritize distribution coverage, inventory availability, and promotional support for high-performing categories and products while identifying opportunities to increase sales contribution from other segments.

4.4 Regional Performance Insight

Revenue performance is concentrated in several provinces. Jawa Barat generates the highest revenue contribution with Rp80.8 M, followed by Jawa Timur with Rp65.7 M.

Business Insight

The concentration of revenue in specific provinces indicates that regional market characteristics and distribution strength influence overall sales performance. High-performing regions can become strategic focus areas for maintaining growth, while lower-performing regions may represent opportunities for expansion.

Recommendation

The company should continue strengthening market penetration in high-performing provinces while evaluating opportunities to improve distribution coverage in other regions.

5. Strategic Recommendations

Business Area	Insight	Recommendation
Channel Strategy	Revenue dominated by Grosir, Minimarket, Distributor	Maintain channel execution and optimize growth channels
Product Strategy	Fabric Care and Personal Care drive revenue	Prioritize availability and promotional support
Regional Strategy	Revenue concentrated in several provinces	Strengthen key markets and explore expansion opportunities
Sales Planning	Revenue fluctuates monthly	Align inventory and campaigns with sales trends

6. Conclusion

The WINGS Group Trade Marketing Performance Analysis provides insights into the key factors influencing business performance, including channel contribution, product performance, and regional distribution.

The analysis highlights that revenue performance is driven by specific channels, product categories, and geographical markets. By leveraging these insights, the Trade Marketing division can improve strategic planning, optimize resource allocation, and develop more effective sales strategies.
